

Golden Coins Business LLC

For Security Solutions &
Decorative Grass fences

Brochure 2024

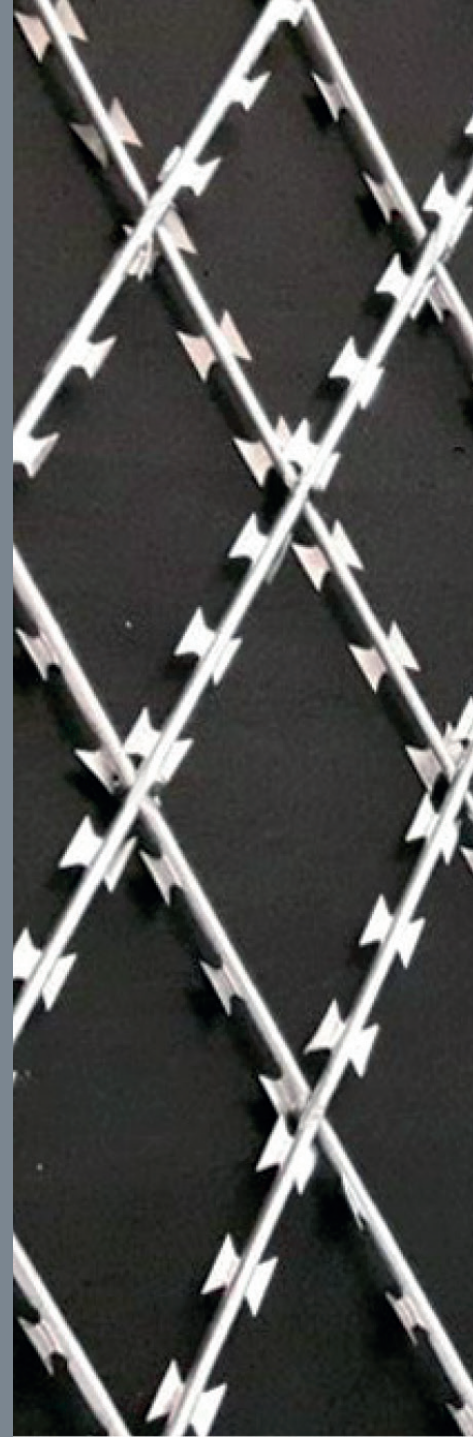

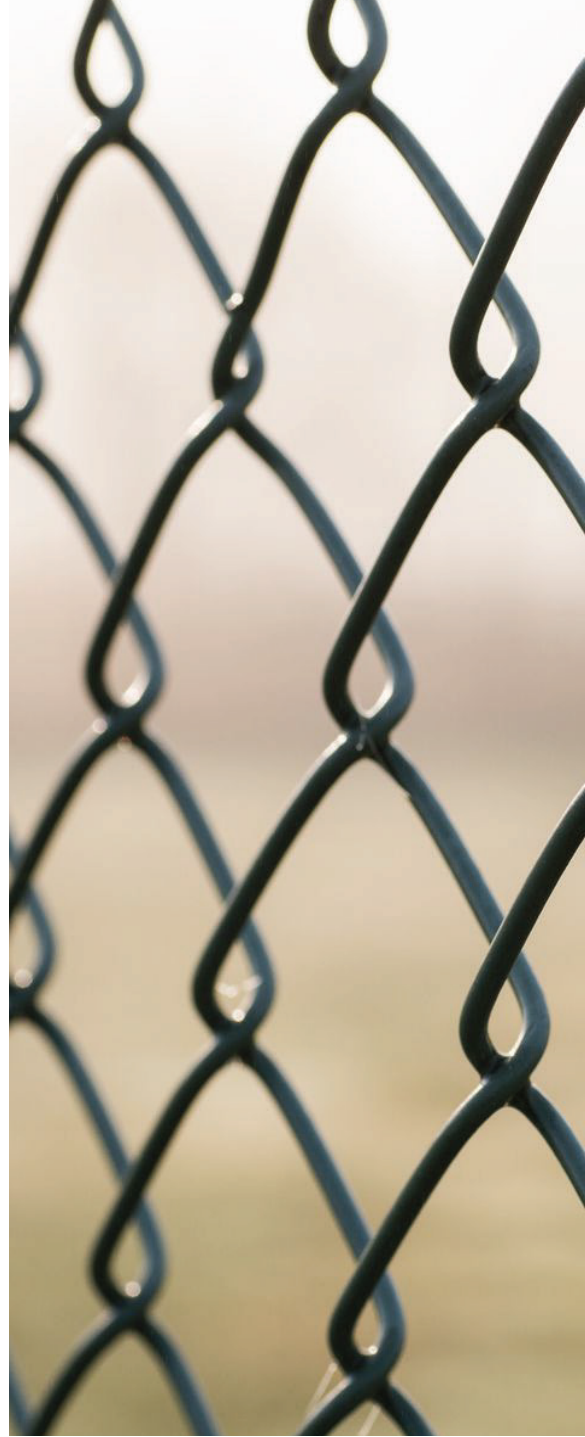

INTRODUCTION

Golden Coins Business is a recognized market leader in various industrial and commercial fields throughout the Middle East and Africa , consisting of several subsidiaries specializing in the design and production of military vehicles, electric commercial vehicles, and industrial grade artificial grass.

Based in Cairo, Egypt Golden Coins factory has recently expanded to the manufacture of fencing solutions , becoming the first of its kind in the Middle East to offer several variants of high quality security fencing as well as aesthetic options for decorative purposes.

Golden Coins Business is honored to present the latest developments in the art of security fencing solutions.

GENERAL FEATURES

A Complete system

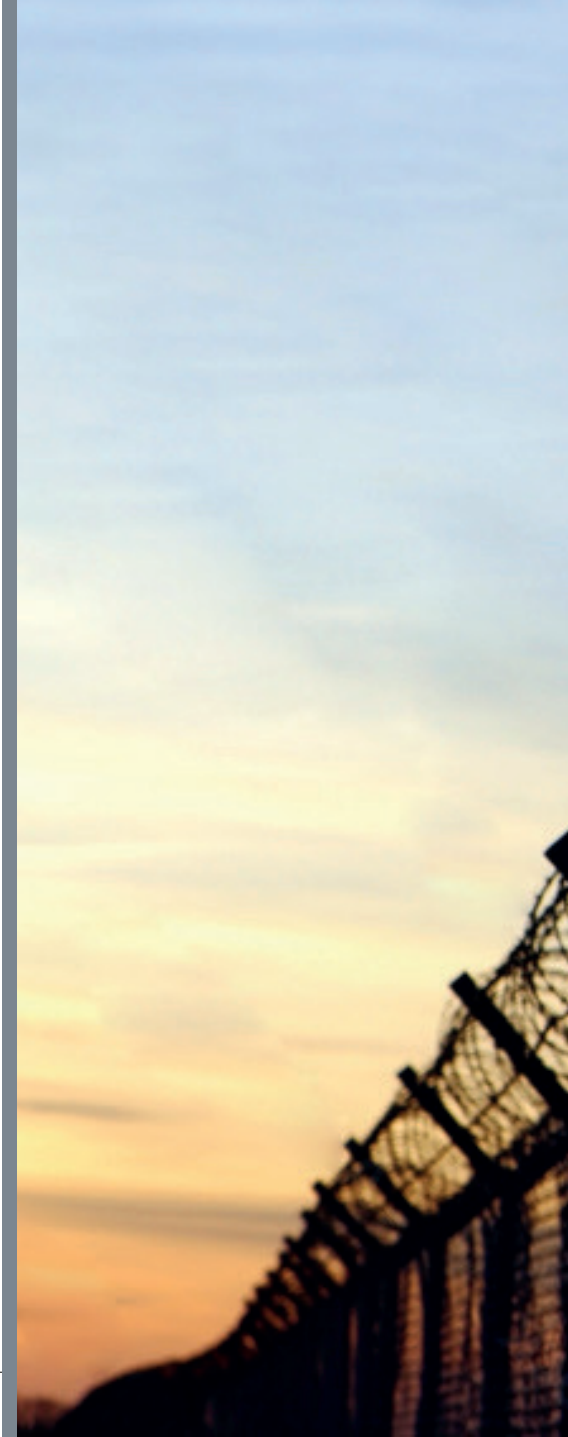

The security fencing design consists of alternating posts and panels, offered at various height specifications and secured through our unique interlocking system.

Excellent Value / Proven Quality / Reasonable Price

Our security fencing solution is offered at a competitive market price. Top grade steel combines with careful electrostatic treatment to create a product guaranteed to stand the test of time.

Simple and Efficient Installation

All components of the fence solution have been developed under a standardized professional system, resulting in a significantly streamlined installation process.

Strength

Heavy weld mesh panels in a standard rectangular design are overlapped with rigid steel wires and horizontal curves to offer maximum resistance to bending in any direction.

Total Protection

The fence system is designed entirely around defence and deterrence. Smooth-cast external facing and narrow vertical bar placement prevent easy climbing from intruders. High torque fixings in the interlocking system render the barrier virtually impossible to overcome with hand tools.

Durable

Careful manufacturing and meticulous protective coating guarantee our fencing a 20+ year life expectancy with minimal maintenance.

Superior Versatile Security

The variety of Marathon fencing solutions offers a unique appearance combined with the strength, rigidity, and durability expected of a superior security system for any and every environment.

**GOLDEN COINS
PRODUCTS FOR
SECURITY FENCES :**

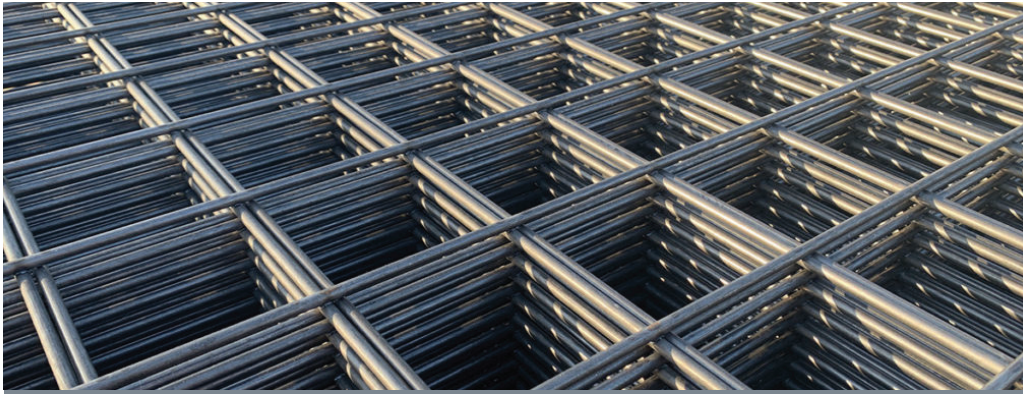

THE GRID SYSTEM

Our most popular design, the Grid Fence is an industry standard in defence, deterrence, and crowd control.

We offer several standard panel sizes as well as custom orders to fit any circumstance .

length : 1m : 6m

Width : 0.5m : 2m

ITEMS

Fence Column :

The Grid system is composed of fence panels supported by galvanized steel columns and coated with electrostatic paint for weather/rust resistance and color preservation with the highest paint specifications from international companies .

Specifications for the columns:

- I. Height** : 1m : 6m (Measured from the finish level of the ground)
- II. Thickness:** 1.8mm or according to customer's request

Fence Panel:

The fence panels have a standard length of 2m, with the height offered between 2-5 m depending on customer request.

Each panel is crafted from overlaid low carbon steel wire, welded by machine at each intersection to minimize inconsistency and maximum strength and precision.

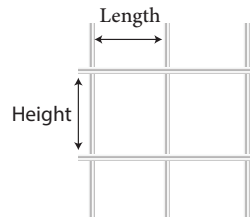

The space between the wires is also adjustable per customer request. We currently offer:

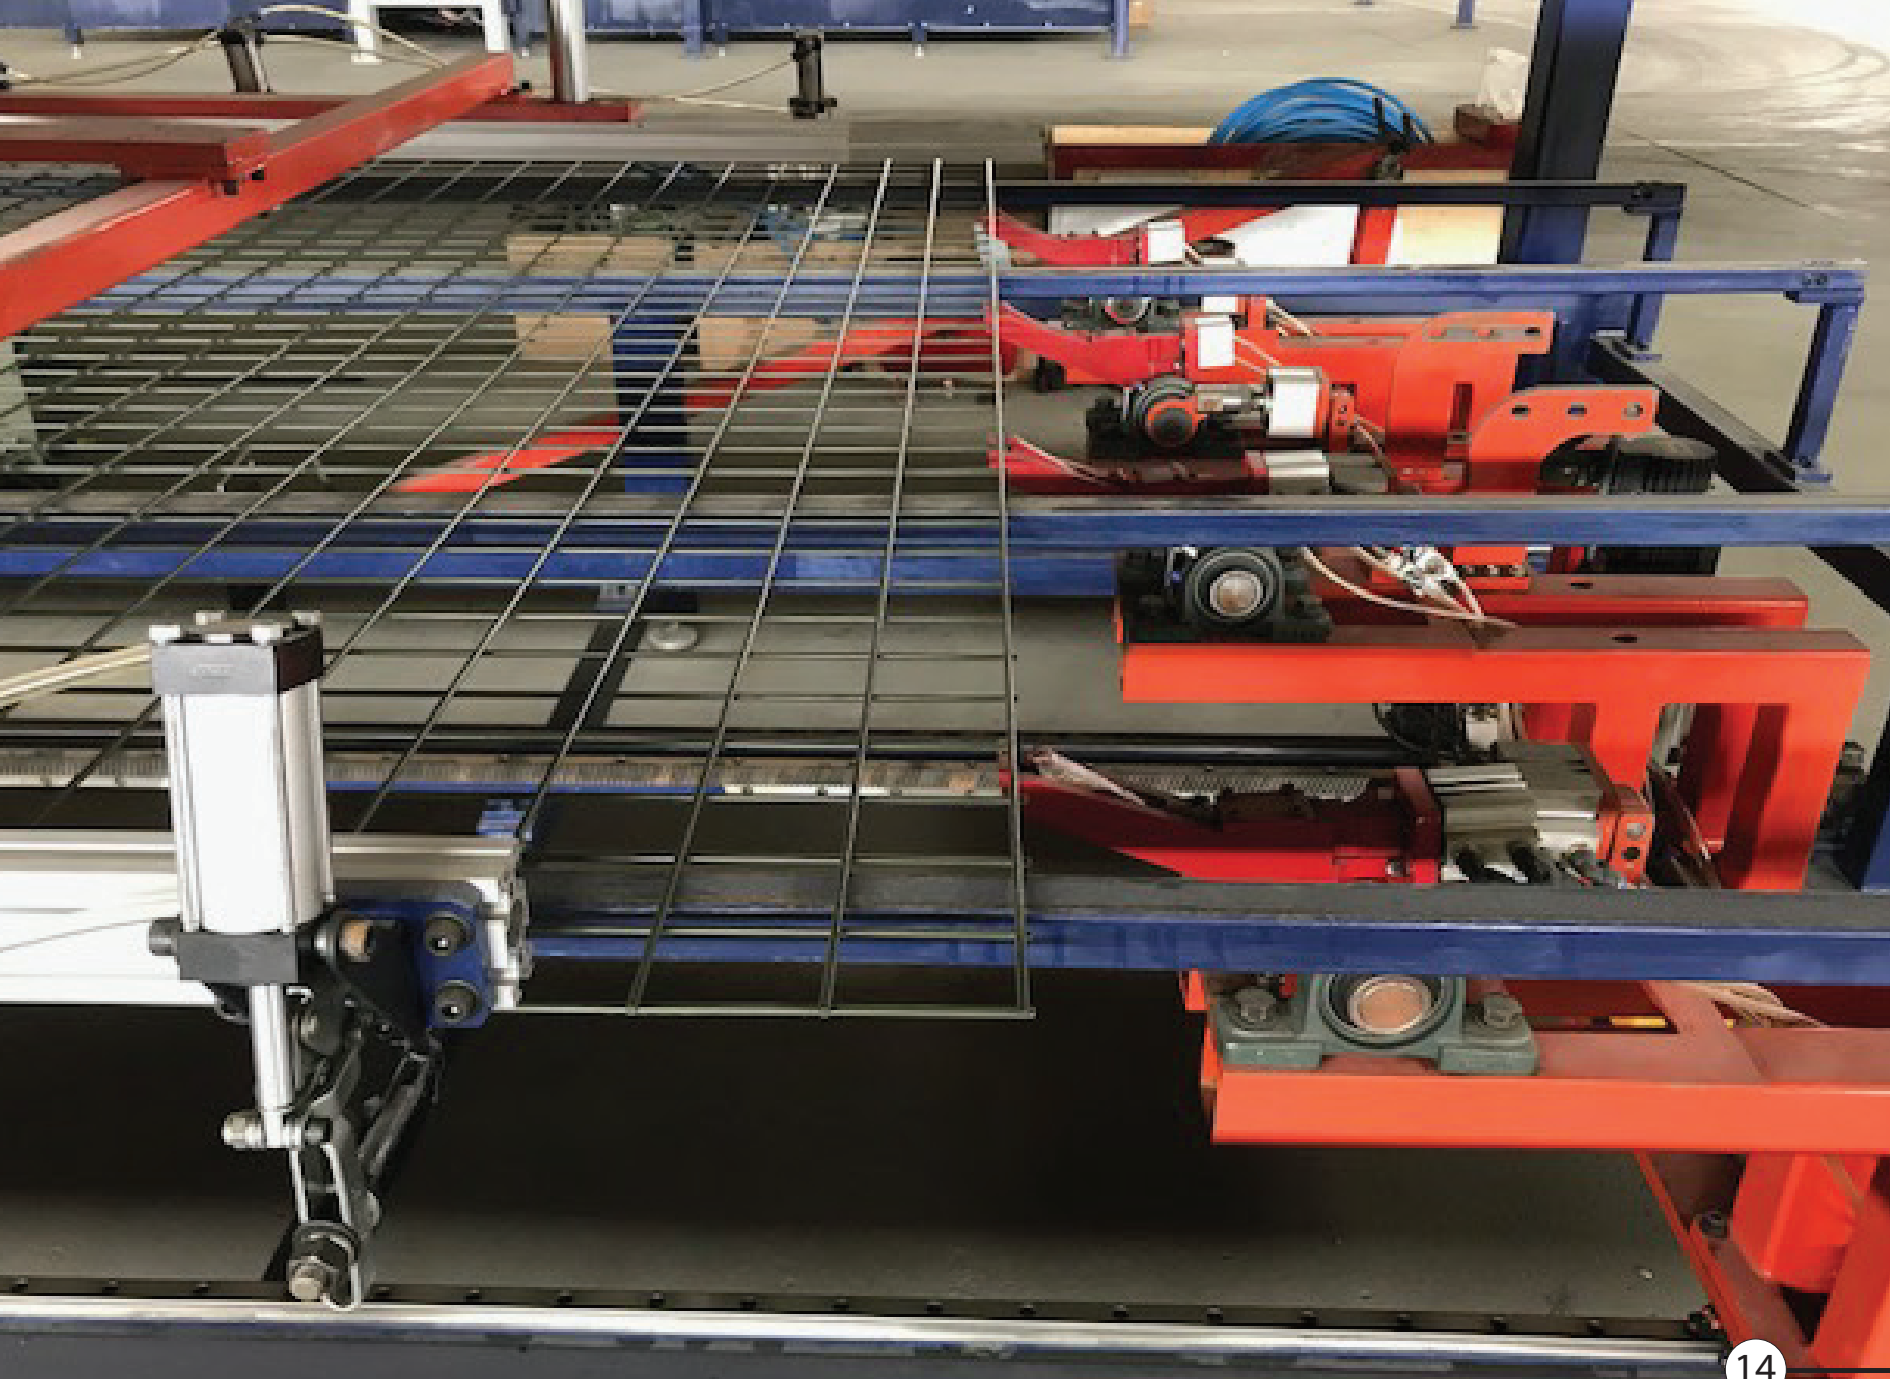

Length: 7cm : 20cm

Height: 1cm : 20cm

(or according to customer's request)

Wire Thickness/ Diameter: 2mm : 6mm

Special parts :

Panel Clips

Fence panels are secured to the columns with high-strength galvanized iron clips.

- Each two clips are joined by a bolt and a nut .

Column Cover

A plastic cover is installed on each coloumn to ensure standard quality for all weather conditions to add a consistent aesthetic shape.

Coating

Every fence panel and column is coated in industrial grade electrostatic paint, carefully applied in specially designed ovens to ensure quality and longevity.

We offer a variety of color options according to customer's request .

2- CHAIN LINK MESH

HEIGHT: 1m : 2.5m

LENGTH: 10m : 20m

WIRE SPACING : 3.8cm : 4.3cm

(or according to customer's request)

WIRE WIDTH/DIAMETER:

2mm : 3mm

WIRE TYPES OFFERED:

Closed from one side

Closed from both sides

Coiled from both sides

The Chain link Fence is a classic in public and private construction, its versatile simplicity making it an excellent candidate for affordable fencing.

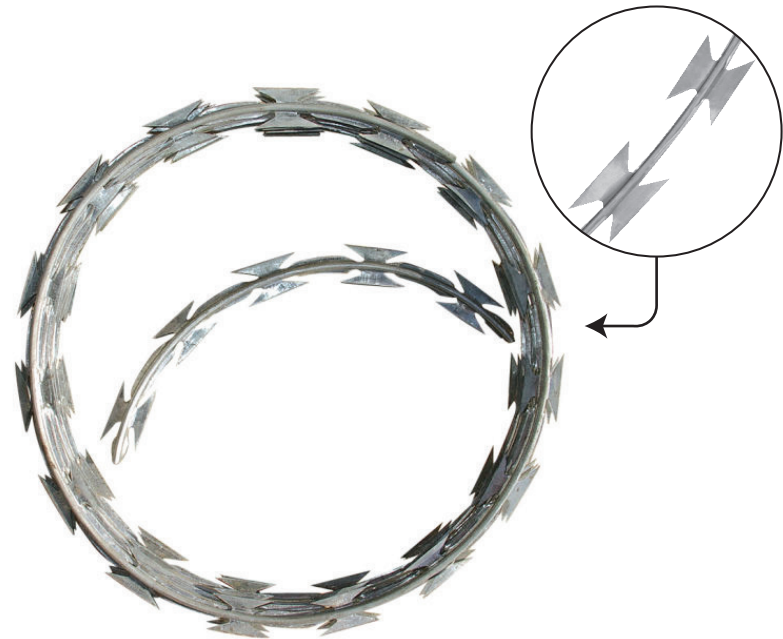

We offer several standard sizes to fit any project, setting, and budget, for example (government agencies, security agencies, Resorts, public parks, clubs, playgrounds, schools, hospitals).

3 - COILED RAZOR WIRE

Cut from hot galvanized steel sheets (PTO-22), the Coiled Razor Wire is an excellent option to enhance the security and deterrence of our Grid and Chain Link fencing systems or to fortify existing fencing, walls, and/or other barriers.

Razor coil Raduis 30 cm : 1 m

4-

RAZOR MESH

The Razor Mesh Fence was designed as a high-security option for commercial, industrial, and government facilities.

The high-tensile reinforced band that constitutes the mesh is nearly impossible to cut, while the diamond mesh pattern of vertical opposing blades discourage climbing and creates an effective entrapment mechanism without sacrificing aesthetic appearance.

PANEL SPECIFICATIONS:

Length: 2m

Height: 2m / 3m / 4m / 5m

GOLDEN COINS

DECORATIVE GRASS FENCES

DEFINITION

Grass fence is a product used for landscaping in terms of beautiful appearance and security purposes. While giving a magic touch to your environment with its green view, it also meets the need for security with the wire mesh inside it.

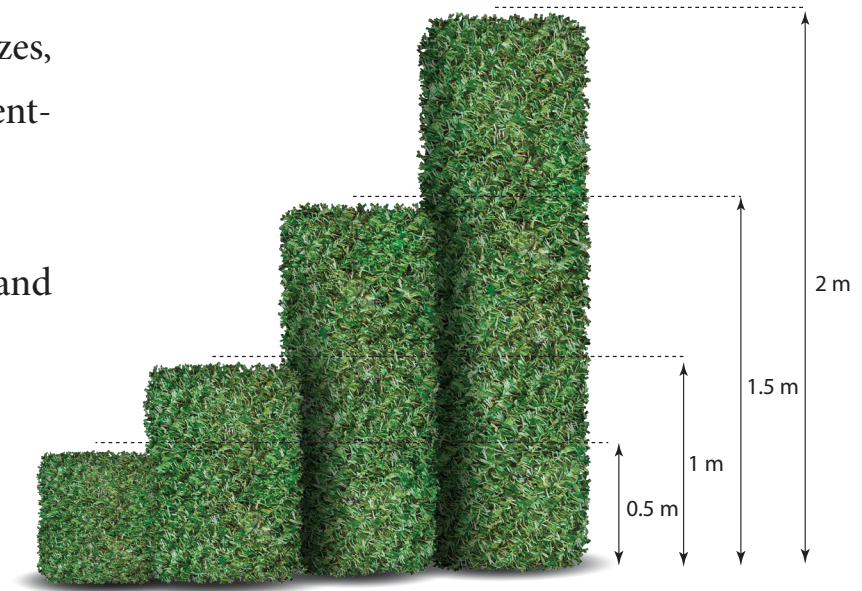

GRASS FENCE FEATURES

- ✔ Prevents the penetration of sunlight
- ✔ Completely obscures vision
- ✔ Allows air movement
- ✔ Easy to clean
- ✔ Strong fire and fade resistance
- ✔ Gives a natural look to flats
- ✔ Maintains its appearance year around
- ✔ Environmental friendly

DIMENSIONS

Grass fences are produced in different sizes, and thanks to its flexible structure, it is presented to you in a rolled form.

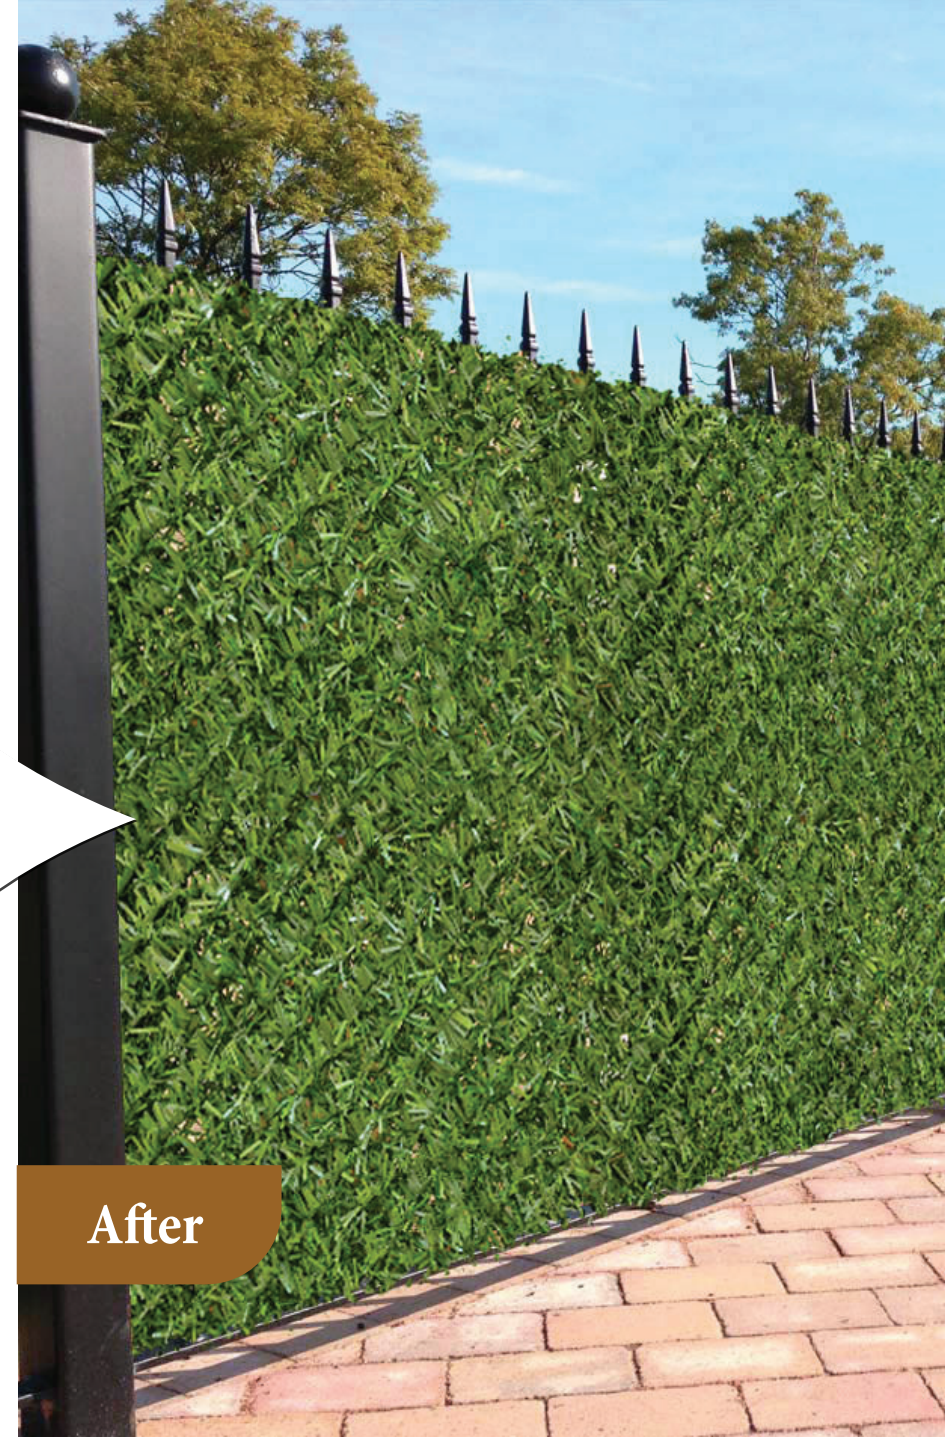

The roll is produced in four different sizes, and the length of the roll is 10 m

FABRICATION AND DELIVERY GUARANTEE

- All GOLDEN COINS products are manufactured in accordance with Egyptian and International factory standards.
- We guarantee the rapid delivery of all products to the assembly site in prime condition.
- Units with manufacturing defects or damage from shipping will be replaced at no additional cost.

QA / QC

Inspection of the fabricated items in our factory as per Specification as following:

- 100% visual and dimension check
- 10% welding and paint testing

DELIVERY AND INSTALLATION

GOLDEN COINS offers on-site delivery and installation for all our products. Our “complete installation” package includes the delivery, storage, technicians, and tools required to complete the job to the specifications of our customers. Every installation includes an alignment and safety regulation inspection before a certification of installment is issued. We currently offer this service to all sites in Egypt.

QUALITY CONTROL AND ASSURANCE

GOLDEN COINS company continuously strives to satisfy customers with outstanding Quality in all of our products and services among all our subsidiaries. In this endeavor, we focus on the main objectives of:

- Maintaining and perpetually improving standards of manufacturing.
- Nurturing talented individuals of quality through continuous education and training.
- Adhering to our “Total Quality” framework to constantly improve functionality of the Quality Management system.

Every GC product is inspected and certified by the floor technician before delivery, expressing our commitment to customer satisfaction and quality assurance.

EXPORTING

The security and grass fences are produced according to international standards at Golden Coins Factory and we are ready to meet our customers requests who wish to import from Egypt.
Our products can be exported to all countries around the world .
